- EMPI

EXPERIENCE SUMMARY:

- Managed Cerner implementation projects; ESM, Orders, FirstNet, CORE, Radiology History & MPI Uploads, CCL and Interfaces.
- Guided key stakeholders including Physicians, Clinical Staff, Nursing management, and IS management through the process of defining system requirements for development.
- Conducted in depth analysis of current process flows and designed future state process flows.
- Acted a liaison between client and Cerner build team.
- Responsible for build of Scheduling (ESM), Orders and Order sets for use on the ESM, PowerChart, PowerChart Office and CPOE projects.
- Responsible for the design and maintenance of integration project plan.
- Managed resource allocation and scheduling across all of the integration project team.
- Prepared and presented bi-weekly project status updates to C Level executives.
- Coordinated SMEs, system analysts, coders and developers in the participation of unit testing 121 interfaces with 25 external systems.
- Performed gap analysis of current standard and custom Cerner reports and reports requested for go live to determine scope of the custom CCL project.
- Facilitated the requirement gathering, process documentation and leadership approval for the Master Person Index and Radiology history upload projects.
- Managed the CORE team efforts including security, location and codeset builds; event set hierarchy redesign; and physician and insurance/health plan loads.
- Performed gap analysis of current and future state models to ensure that implementation of ESM and new policies and procedures adequately addressed all requirements.
- Developed test scripts for use during unit and functional testing.
- Developed training documentation and user guides for training sessions for clinical staff.
- Coordinated the redesign and implementation of the user security model.
- Supported twelve outpatient clinics with the conversion from PowerChart Office to PowerChart Enhanced View.
- Trained and provided one on one physician tutoring covering all aspects of Enhanced View.
- Managed the design teams consisting clinicians from various disciplines.
- Conducted WBS planning sessions and managed resource allocation.
